Is the requested medication for a chronic or long-term condition for which the prescription medication may be necessary for the life of the patient?
What is the indication or diagnosis? Castleman disease (CD, giant lymph node hyperplasia, angiofollicular lymph node hyperplasia) COVID 19 (Coronavirus Disease 2019) Crohn's Disease Cytokine Release Syndrome (CRS) associated with Chimeric Antigen Receptor (CAR) T-Cell Therapy Giant Cell Arteritis (GCA) (temporal arteritis) Inflammatory Arthritis Associated with Checkpoint Inhibitor Therapy Management of Immunotherapy-Related Toxicities - Immune Checkpoint Inhibitor-Related Toxicities (not including inflammatory arthritis) Polyarticular Juvenile Idiopathic Arthritis (pJIA) Polymyalgia Rheumatica Rheumatoid Arthritis (RA) Still's disease, adult onset Note: Adult-onset Still's disease (AOSD) and systemic juvenile idiopathic arthritis (SJIA) are considered the same disease (Still's disease) but differ in age of onset. For a patient less than 18 years of age, refer to the SJIA indication Systemic Juvenile Idiopathic Arthritis (sJIA) Note: Systemic juvenile idiopathic arthritis (SJIA) and adult-onset Still's disease (AOSD) are considered the same disease (Still's disease) but differ in age of onset. For a patient greater than or equal to 18 years of age, refer to AOSD indication other (please specify):
Clinical Information:
If Rheumatoid Arthritis:
Will the requested medication be given in combination with a BIOLOGIC or in combination with a targeted synthetic oral small molecule drug? Biologic (an adalimumab product [Humira, biosimilar], Bimzelx, Cimzia, Cosentyx (IV or SC), etanercept SC product [Enbrel, biosimilar], Entyvio (IV or SC), Ilumya, infliximab IV products [Remicade, biosimilar], Kevzara, Kineret, Omvoh (IV or SC), Orencia [IV or SC], a rituximab IV product [Rituxan, biosimilar], Skyrizi (IV or SC), Siliq, Simponi [Aria or SC]), Taltz, a tocilizumab product [Actemra (SC), biosimilar], Tremfya (IV or SC), an ustekinumab product (Stelara IV or SC, biosimilar), or Zymfentra. Targeted synthetic oral small molecule drug (such as Cibinqo, Leqselvi, Litfulo, Sotyktu, Olumiant, Otezla, Rinvoq, Rinvoq LQ, Xeljanz, Xeljanz XR, Velsipity, or Zeposia.) Conventional synthetic DMARD (such as methotrexate, leflunomide, sulfasalazine, hydroxychloroquine) No, the requested medication will NOT be used in combination with another BIOLOGIC or targeted synthetic oral small molecule drug
Is the patient currently receiving a tocilizumab (subcutaneous or intravenous product)?
Has the patient already received at least 6 months of therapy with a tocilizumab (subcutaneous or intravenous product)? Please Note: Answer No if the patient has received less than 6 months of therapy or if the patient is restarting therapy with a tocilizumab (subcutaneous or intravenous product).
Has the patient tried or is currently taking a one conventional synthetic disease-modifying antirheumatic drug (DMARD) (brand or generic; oral or injectable) for at least 3 months? Please Note: Examples of conventional synthetic DMARDs are methotrexate [oral or injectable], leflunomide, sulfasalazine, and hydroxychloroquine.
Has the patient tried one biologic for at least 3 months? Please Note: Examples of biologics used for rheumatoid arthritis are Cimzia, an etanercept product (for example, Enbrel, biosimilars), an adalimumab product (for example Humira, biosimilars), an infliximab IV product (for example, Remicade, biosimilars), Kevzara, Orencia (IV or SC), Simponi (Aria or SC), Kineret, and a rituximab product (for example, Rituxan, biosimilars).
Is the medication prescribed by or in consultation with a rheumatologist?
Has the patient experienced a beneficial clinical response when assessed by at least one objective measure? Please Note: Examples of standardized and validated measures of disease activity include Clinical Disease Activity Index (CDAI), Disease Activity Score (DAS) 28 using erythrocyte sedimentation rate (ESR) or C-reactive protein (CRP), Patient Activity Scale (PAS)-II, Rapid Assessment of Patient Index Data 3 (RAPID-3), and/or Simplified Disease Activity Index (SDAI).
Has the patient experienced an improvement in at least one symptom, such as decreased joint pain, morning stiffness, or fatigue; improved function or activities of daily living; decreased soft tissue swelling in joints or tendon sheaths?
If Castleman disease:
Will the requested medication be given in combination with a BIOLOGIC or in combination with a targeted synthetic oral small molecule drug?
☐ Biologic (an adalimumab product [Humira, biosimilar], Bimzelx, Cimzia, Cosentyx (IV or SC), etanercept SC product

 [Enbrel, biosimilar], Entyvio (IV or SC), Ilumya, infliximab IV products [Remicade, biosimilar], Kevzara, PSC), Orencia [IV or SC], a rituximab IV product [Rituxan, biosimilar], Skyrizi (IV or SC), Siliq, Simponi [Astocilizumab product [Actemra (SC), biosimilar], Tremfya (IV or SC), an ustekinumab product (Stelara IV Zymfentra. ☐ Targeted synthetic oral small molecule drug (such as Cibinqo, Leqselvi, Litfulo, Sotyktu, Olumiant, OLQ, Xeljanz, Xeljanz XR, Velsipity, or Zeposia.) ☐ Conventional synthetic DMARD (such as methotrexate, leflunomide, sulfasalazine, hydroxychloroqui ☐ No, the requested medication will NOT be used in combination with another BIOLOGIC or targeted smolecule drug 	uria or SC]), Taltz, a or SC, biosimilar), or utezla, Rinvoq, Rinvoq uine)
Is the patient currently receiving a tocilizumab (subcutaneous or intravenous product)?	☐ Yes ☐ No
Has the patient already received at least 6 months of therapy with a tocilizumab (subcutaneous or intravenous pr Answer No if the patient has received less than 6 months of therapy or if the patient is restarting therapy with a to (subcutaneous or intravenous product).	
Is the patient negative for the human immunodeficiency virus (HIV) and human herpesvirus-8 (HHV-8)?	☐ Yes ☐ No
Is the medication being used for relapsed or refractory disease?	☐ Yes ☐ No
Is the medication prescribed by or in consultation with an oncologist or hematologist?	☐ Yes ☐ No
Has the patient experienced a beneficial clinical response when assessed by at least one objective measure? Ple Examples of objective measures include clinically significant improvement or normalization of serum markers (for protein, erythrocyte sedimentation rate, fibrinogen, albumin, and/or hemoglobin), increased body mass index, an lymphadenopathy.	r example, C-reactive
Has the patient experienced an improvement in at least one symptom, such as improvement or resolution of con (for example, fatigue, physical function)?	stitutional symptoms ☐ Yes ☐ No
If Giant Cell Arteritis:	
Will the requested medication be given in combination with a BIOLOGIC or in combination with a targeted synthedrug? Biologic (an adalimumab product [Humira, biosimilar], Bimzelx, Cimzia, Cosentyx (IV or SC), etanero [Enbrel, biosimilar], Entyvio (IV or SC), Ilumya, infliximab IV products [Remicade, biosimilar], Kevzara, k SC), Orencia [IV or SC], a rituximab IV product [Rituxan, biosimilar], Skyrizi (IV or SC), Siliq, Simponi [A tocilizumab product [Actemra (SC), biosimilar], Tremfya (IV or SC), an ustekinumab product (Stelara IV Zymfentra. Targeted synthetic oral small molecule drug (such as Cibinqo, Leqselvi, Litfulo, Sotyktu, Olumiant, O LQ, Xeljanz, Xeljanz XR, Velsipity, or Zeposia.) Conventional synthetic DMARD (such as methotrexate, leflunomide, sulfasalazine, hydroxychloroquide) No, the requested medication will NOT be used in combination with another BIOLOGIC or targeted symplectule drug	cept SC product Kineret, Omvoh (IV or uria or SC]), Taltz, a or SC, biosimilar), or utezla, Rinvoq, Rinvoq
Is the patient currently receiving a tocilizumab (subcutaneous or intravenous product)?	☐ Yes ☐ No
Has the patient already received at least 6 months of therapy with a tocilizumab (subcutaneous or intravenous pr Answer No if the patient has received less than 6 months of therapy or if the patient is restarting therapy with a to (subcutaneous or intravenous product).	
Has the patient tried or is currently taking a systemic corticosteroid? Please Note: An example of a systemic cort prednisone.	icosteroid is ☐ Yes ☐ No
(if no) Are systemic corticosteroids contraindicated for this patient?	☐ Yes ☐ No
Is the medication being prescribed by or in consultation with a rheumatologist?	☐ Yes ☐ No
When assessed by at least one objective measure, has the patient experienced a beneficial clinical response fro initiating a tocilizumab (subcutaneous or intravenous product)? Please Note: Examples of objective measures ar example, C-reactive protein, erythrocyte sedimentation rate), resolution of fever, and/or reduced dosage of cortic Compared with baseline (prior to receiving a tocilizumab (subcutaneous or intravenous product), has the patient	e serum markers (for costeroids. Yes No
improvement in at least one symptom, such as decreased headache, scalp, or jaw pain; decreased fatigue, and/	
If Polymyalgia Rheumatica:	
Will the requested medication be given in combination with a BIOLOGIC or in combination with a targeted synthedrug?	etic oral small molecule
☐ Biologic (an adalimumab product [Humira, biosimilar], Bimzelx, Cimzia, Cosentyx (IV or SC), etanero [Enbrel, biosimilar], Entyvio (IV or SC), Ilumya, infliximab IV products [Remicade, biosimilar], Kevzara, k	

SC), Orencia [IV or SC], a rituximab IV product [Rituxan, biosimilar], Skyrizi (IV or SC), Siliq, Simponi [Aria o tocilizumab product [Actemra (SC), biosimilar], Tremfya (IV or SC), an ustekinumab product (Stelara IV or SC), Zymfentra.	C, biosimilar), or
☐ Targeted synthetic oral small molecule drug (such as Cibinqo, Leqselvi, Litfulo, Sotyktu, Olumiant, Otezla LQ, Xeljanz, Xeljanz XR, Velsipity, or Zeposia.)☐ Conventional synthetic DMARD (such as methotrexate, leflunomide, sulfasalazine, hydroxychloroquine)	ı, Rinvoq, Rinvoq
☐ No, the requested medication will NOT be used in combination with another BIOLOGIC or targeted synth molecule drug	etic oral small
Is the patient currently receiving a tocilizumab (subcutaneous or intravenous product)?	☐ Yes ☐ No
Has the patient already received at least 6 months of therapy with a tocilizumab (subcutaneous or intravenous product Answer No if the patient has received less than 6 months of therapy or if the patient is restarting therapy with a tocilized (subcutaneous or intravenous product).	
Has the patient tried one systemic corticosteroid? Please Note: An example of a systemic corticosteroid is prednisone	e. 🗌 Yes 🗌 No
Is the medication prescribed by or in consultation with a rheumatologist?	☐ Yes ☐ No
When assessed by at least one objective measure, has the patient experienced a beneficial clinical response from bainitiating a tocilizumab (subcutaneous or intravenous product)? Please Note: Examples of objective measures are ser (for example, C-reactive protein, erythrocyte sedimentation rate), resolution of fever, and/or reduced dosage of cortico	rum markers osteroids. Yes No
Compared with baseline (prior to receiving a tocilizumab (subcutaneous or intravenous product), has the patient experimprovement in at least one symptom, such as decreased shoulder, neck, upper arm, hip, or thigh pain or stiffness; in motion; and/or decreased fatigue?	
If Still's disease:	
Will the requested medication be given in combination with a BIOLOGIC or in combination with a targeted synthetic o drug?	ral small molecule
☐ Biologic (an adalimumab product [Humira, biosimilar], Bimzelx, Cimzia, Cosentyx (IV or SC), etanercept [Enbrel, biosimilar], Entyvio (IV or SC), Ilumya, infliximab IV products [Remicade, biosimilar], Kevzara, Kinero SC), Orencia [IV or SC], a rituximab IV product [Rituxan, biosimilar], Skyrizi (IV or SC), Siliq, Simponi [Aria o tocilizumab product [Actemra (SC), biosimilar], Tremfya (IV or SC), an ustekinumab product (Stelara IV or SC) Zymfentra.	et, Ömvoh (IV or r SC]), Taltz, a C, biosimilar), or
 ☐ Targeted synthetic oral small molecule drug (such as Cibinqo, Leqselvi, Litfulo, Sotyktu, Olumiant, Otezla LQ, Xeljanz, Xeljanz XR, Velsipity, or Zeposia.) ☐ Conventional synthetic DMARD (such as methotrexate, leflunomide, sulfasalazine, hydroxychloroquine) ☐ No, the requested medication will NOT be used in combination with another BIOLOGIC or targeted synth molecule drug 	
Is the patient currently receiving a tocilizumab (subcutaneous or intravenous product)?	☐ Yes ☐ No
Has the patient already received at least 6 months of therapy with a tocilizumab (subcutaneous or intravenous product Answer No if the patient has received less than 6 months of therapy or if the patient is restarting therapy with a tocilized (subcutaneous or intravenous product).	
Is the medication prescribed by or in consultation with a rheumatologist?	☐ Yes ☐ No
Has the patient experienced a beneficial clinical response when assessed by at least one objective measure? Please of objective measures include resolution of fever, improvement in rash or skin manifestations, clinically significant imprormalization of serum markers (for example, C-reactive protein, erythrocyte sedimentation rate), and/or reduced dos corticosteroids.	provement or
Has the patient experienced an improvement in at least one symptom, such as less joint pain/tenderness, stiffness, o decreased fatigue; improved function or activities of daily living?	r swelling; ☐ Yes ☐ No
If Systemic juvenile idiopathic arthritis:	
Will the requested medication be given in combination with a BIOLOGIC or in combination with a targeted synthetic o	ral small molecule
drug? Biologic (an adalimumab product [Humira, biosimilar], Bimzelx, Cimzia, Cosentyx (IV or SC), etanercept [Enbrel, biosimilar], Entyvio (IV or SC), Ilumya, infliximab IV products [Remicade, biosimilar], Kevzara, Kinere SC), Orencia [IV or SC], a rituximab IV product [Rituxan, biosimilar], Skyrizi (IV or SC), Siliq, Simponi [Aria o tocilizumab product [Actemra (SC), biosimilar], Tremfya (IV or SC), an ustekinumab product (Stelara IV or SC) Zymfentra.	et, Ömvoh (IV or r SC]), Taltz, a

☐ Targeted synthetic oral small molecule drug (such as Cibinqo, Leqselvi, Litfulo, Sotyktu, Olumiant, Otezla LQ, Xeljanz, Xeljanz XR, Velsipity, or Zeposia.) ☐ Conventional synthetic DMARD (such as methotrexate, leflunomide, sulfasalazine, hydroxychloroquine) ☐ No, the requested medication will NOT be used in combination with another BIOLOGIC or targeted synth molecule drug	
Is the patient currently receiving a tocilizumab (subcutaneous or intravenous product)?	☐ Yes ☐ No
Has the patient already received at least 6 months of therapy with a tocilizumab (subcutaneous or intravenous product Answer No if the patient has received less than 6 months of therapy or if the patient is restarting therapy with a tociliz (subcutaneous or intravenous product).	
Is the medication prescribed by or in consultation with a rheumatologist?	☐ Yes ☐ No
When assessed by at least one objective measure, has the patient experienced a beneficial clinical response from bainitiating a tocilizumab (subcutaneous or intravenous product)? Please Note: Examples of objective measures include fever, improvement in rash or skin manifestations, clinically significant improvement or normalization of serum market C-reactive protein, erythrocyte sedimentation rate), and/or reduced dosage of corticosteroids.	e resolution of
Compared with baseline (prior to initiating a tocilizumab (subcutaneous or intravenous product), has the patient experimprovement in at least one symptom, such as less joint pain/tenderness, stiffness, or swelling; decreased fatigue; imactivities of daily living?	
If Polyarticular juvenile idiopathic arthritis:	
Will the requested medication be given in combination with a BIOLOGIC or in combination with a targeted synthetic of	ral small molecule
drug? Biologic (an adalimumab product [Humira, biosimilar], Bimzelx, Cimzia, Cosentyx (IV or SC), etanercept [Enbrel, biosimilar], Entyvio (IV or SC), Ilumya, infliximab IV products [Remicade, biosimilar], Kevzara, Kiner SC), Orencia [IV or SC], a rituximab IV product [Rituxan, biosimilar], Skyrizi (IV or SC), Siliq, Simponi [Aria o tocilizumab product [Actemra (SC), biosimilar], Tremfya (IV or SC), an ustekinumab product (Stelara IV or SZymfentra.	et, Omvoh (IV or r SC]), Taltz, a
☐ Targeted synthetic oral small molecule drug (such as Cibinqo, Leqselvi, Litfulo, Sotyktu, Olumiant, Otezla LQ, Xeljanz, Xeljanz XR, Velsipity, or Zeposia.) ☐ Conventional synthetic DMARD (such as methotrexate, leflunomide, sulfasalazine, hydroxychloroquine) ☐ No, the requested medication will NOT be used in combination with another BIOLOGIC or targeted synth molecule drug	
Is the patient currently receiving a tocilizumab (subcutaneous or intravenous product)?	☐ Yes ☐ No
Has the patient already received at least 6 months of therapy with a tocilizumab (subcutaneous or intravenous product Answer No if the patient has received less than 6 months of therapy or if the patient is restarting therapy with a tociliz (subcutaneous or intravenous product).	
Has the patient tried one other systemic therapy for this condition? Please Note: Examples of other systemic therapie methotrexate (MTX), sulfasalazine, leflunomide, or a nonsteroidal anti-inflammatory drug (NSAID), or a biologic disear antirheumatic drug (DMARD; for example, an adalimumab product [for example, Humira, biosimilars], an etanercept pexample, Enbrel, biosimilars], an infliximab product [for example, Remicade, biosimilars], Kineret [anakinra SC injection]).	semodifying product [for
Will the patient be starting on a tocilizumab intravenous product concurrently with methotrexate (MTX), sulfasalazine,	
Does the patient have an absolute contraindication to methotrexate (MTX), sulfasalazine, or leflunomide? Please Not absolute contraindication to methotrexate include pregnancy, breast feeding, alcoholic liver disease, immunodeficience blood dyscrasias.	
Does the patient have aggressive disease, as determined by the prescriber? Is the medication prescribed by or in consultation with a rheumatologist?	☐ Yes ☐ No ☐ Yes ☐ No
When assessed by at least one objective measure, has the patient experienced a beneficial clinical response from baintiating a tocilizumab (subcutaneous or intravenous product)? Please Note: Examples of objective measures include Global Assessment (MD global), Parent/Patient Global Assessment of Overall Well-Being (PGA), Parent/Patient Global Disease Activity (PDA), Juvenile Arthritis Disease Activity Score (JDAS), Clinical Juvenile Arthritis Disease Activity Score (JDAS), Serum markers (for example, C-reactive protein, erythrograte), and/or reduced dosage of corticosteroids.	e Physician pal Assessment of core (cJDAS),
Compared with baseline (prior to receiving a tocilizumab (subcutaneous or intravenous product), has the patient experimprovement in at least one symptom, such as improvement in limitation of motion, less joint pain or tenderness, decimorning stiffness or fatigue, improved function or activities of daily living?	
If Cytokine release syndrome (CRS):	

Will the requested medication be given in combination with a BIOLOGIC disease-modifying antirheumatic drug (DMAF combination with a targeted synthetic oral small molecule drug?	RD) or in Yes IN	No
Is the requested medication being prescribed for a patient who has been or will be treated with a chimeric antigen receiverapy? Please Note: Examples of CAR T-cell therapy include Abecma (idecabtagene vicleucel injection), Aucatzyl (cautoleucel), Breyanzi (lisocabtagene maraleucel intravenous infusion), Carvykti (ciltacabtagene autoleucel), Kymriah (intravenous infusion), Tecartus (brexucabtagene intravenous infusion), and Yescarta (axicabtagene ciloleucel intravenous infusion)	becabtagene tisagenlecleu	e icel i.
If Inflammatory Arthritis with checkpoint inhibitor therapy: Note: Examples of checkpoint inhibitors include (pembrolizumab IV infusion), Opdivo (nivolumab IV infusion), Yervoy (ipilimumab IV infusion), Tecentriq (atezolizumab Bavencio (avelumab IV infusion), Imfinzi (durvalumab IV infusion), and Libtayo (cemiplimab-rwlc IV infusion).		
Will the requested medication be given in combination with a BIOLOGIC or in combination with a targeted synthetic or drug?	al small mole	cule
Biologic (an adalimumab product [Humira, biosimilar], Bimzelx, Cimzia, Cosentyx (IV or SC), etanercept S [Enbrel, biosimilar], Entyvio (IV or SC), Ilumya, infliximab IV products [Remicade, biosimilar], Kevzara, Kinere SC), Orencia [IV or SC], a rituximab IV product [Rituxan, biosimilar], Skyrizi (IV or SC), Siliq, Simponi [Aria or tocilizumab product [Actemra (SC), biosimilar], Tremfya (IV or SC), an ustekinumab product (Stelara IV or SC Zymfentra.	t, Omvoh (IV SC]), Taltz, a	а
☐ Targeted synthetic oral small molecule drug (such as Cibinqo, Leqselvi, Litfulo, Sotyktu, Olumiant, Otezla, LQ, Xeljanz, Xeljanz XR, Velsipity, or Zeposia.) ☐ Conventional synthetic DMARD (such as methotrexate, leflunomide, sulfasalazine, hydroxychloroquine) ☐ No, the requested medication will NOT be used in combination with another BIOLOGIC or targeted synthemolecule drug		
	☐ Yes ☐ N	do.
Has the patient already received at least 6 months of therapy with a tocilizumab (subcutaneous or intravenous product Answer No if the patient has received less than 6 months of therapy or if the patient is restarting therapy with a tocilizumab (subcutaneous or intravenous product Answer No if the patient has received less than 6 months of therapy or if the patient is restarting therapy with a tocilizumab (subcutaneous or intravenous product Answer No if the patient has received less than 6 months of therapy or if the patient is restarting therapy with a tocilizumab (subcutaneous or intravenous product Answer No if the patient has received less than 6 months of therapy or if the patient is restarting therapy with a tocilizumab (subcutaneous or intravenous product Answer No if the patient has received less than 6 months of therapy or if the patient is restarting therapy with a tocilizumab (subcutaneous or intravenous product Answer No if the patient has received less than 6 months of the patient ha	:)?
